# How an LLM 'thinks'

# Transformers

## How Transformers Work: A Step-by-Step Breakdown

A sequence of words or tokens that the model will process.

# Tokenization

"It's not the size of the dog in the fight—it's the size of the fight in the dog."

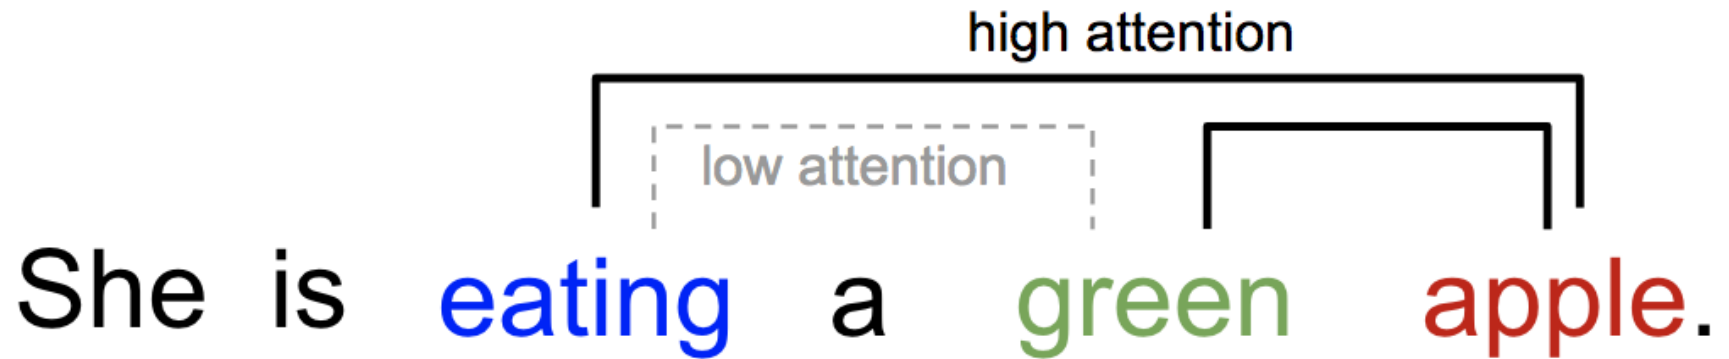

"It's not the size of the dog in the fight—it's the size of the fight in the dog."

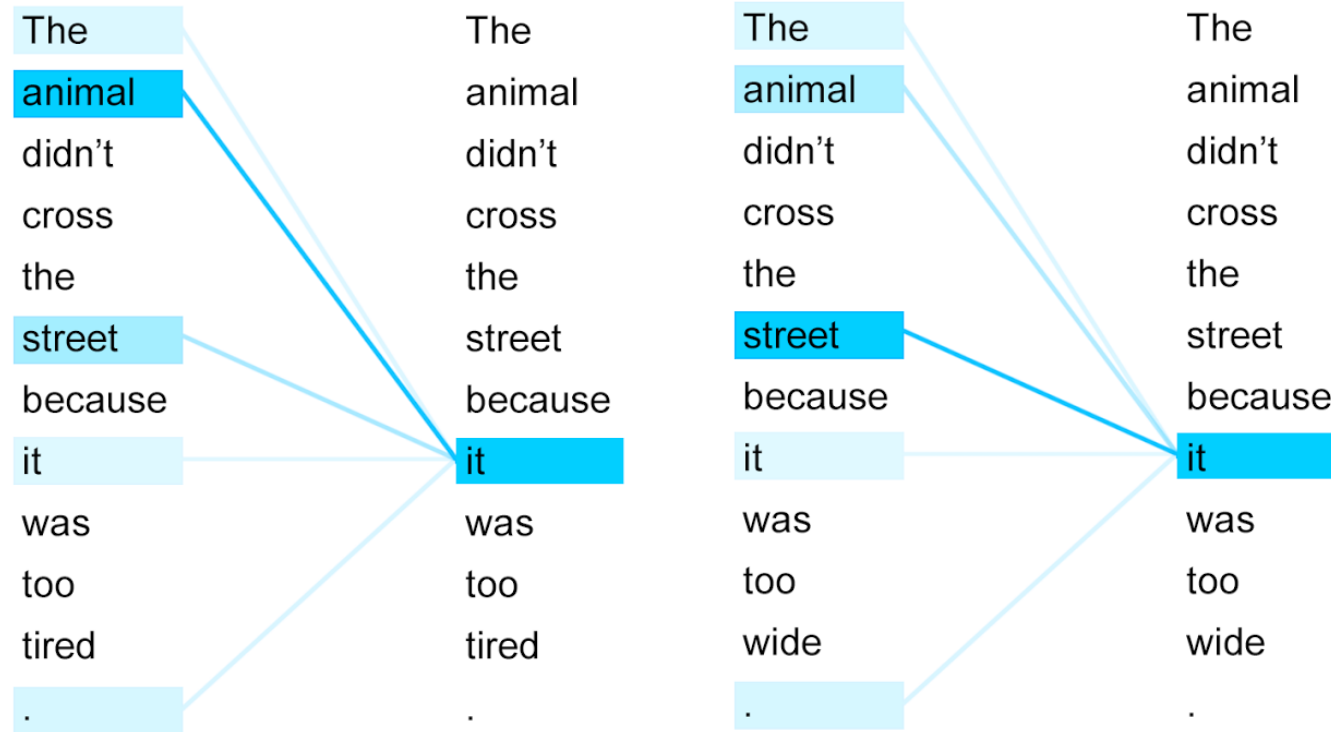

[68093, 802, 625, 290, 2349, 328, 290, 6446, 306, 290, 9848, 2322, 64190, 290, 2349, 328, 290, 9848, 306, 290, 6446, 3692]

- $(0, 119, 73) \rightarrow$  **Emerald Green**
- $(0, 71, 133) \rightarrow$  **Cobalt Blue**
- $(2, 670, 76, 2159, 551, 24590, \dots 1072) \rightarrow$  'mat'

# What It Means for Us

# What It Means for Us

- Position Sensitivity

# What It Means for Us

- Position Sensitivity
- Length, Structure, and Phrasing change Attention

# What It Means for Us

- Position Sensitivity
  - Front-load your key instructions
- Length, Structure, and Phrasing change Attention
  - Use summaries and headings
  - Delimit and isolate
  - Be clear and consistent

# Recap

## Few-Shot

- Input-output example pairs
- <https://doi.org/10.48550/arXiv.2005.14165>

## Generate Knowledge

- Background information first
- <https://doi.org/10.48550/arXiv.2110.08387>

## Chain-of-Thought

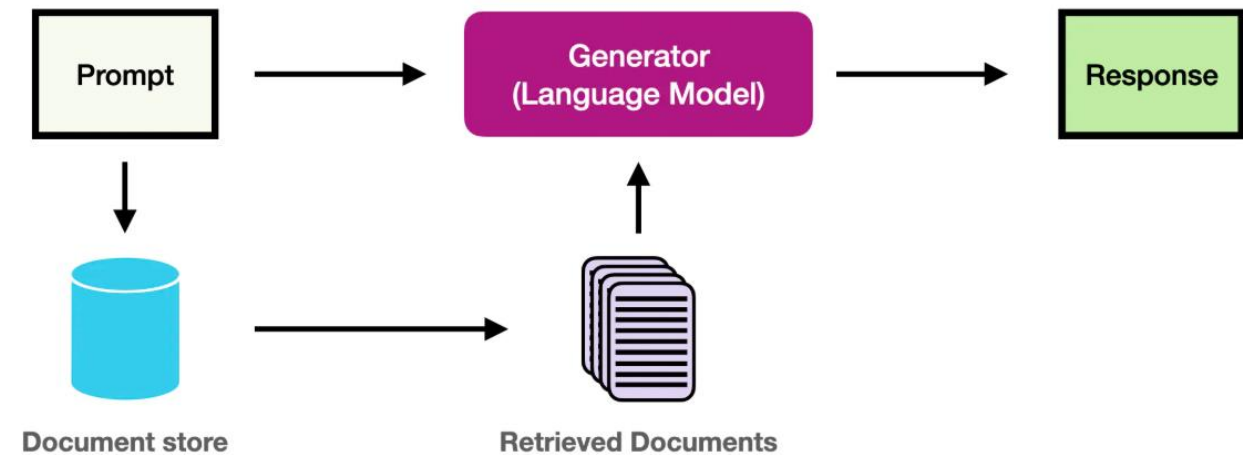

- Articulate intermediate reasoning
- <https://doi.org/10.48550/arXiv.2201.11903>

## Role Prompting

- Adopt a persona or viewpoint
- <https://doi.org/10.48550/arXiv.2308.07702>

# Retrieval-Augmented Generation (RAG)

- Fetch relevant external documents into the prompt before generating response
- Grounds responses in domain-specific information, reducing hallucinations and increasing relevancy and accuracy

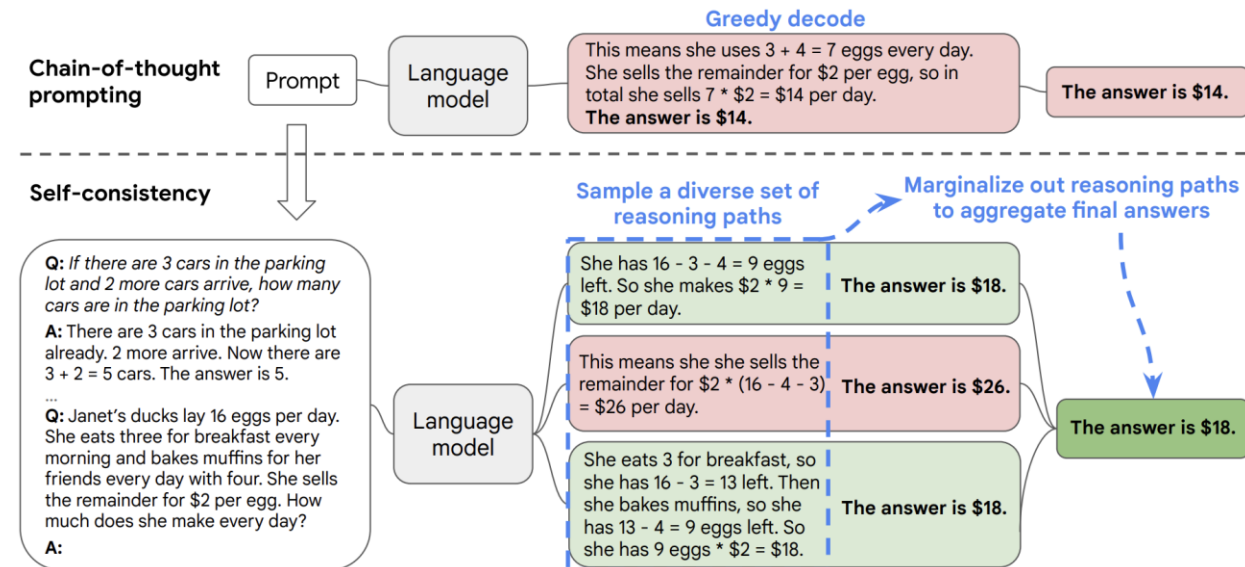

<https://gettectonic.com/retrieval-augmented-generation-techniques/>

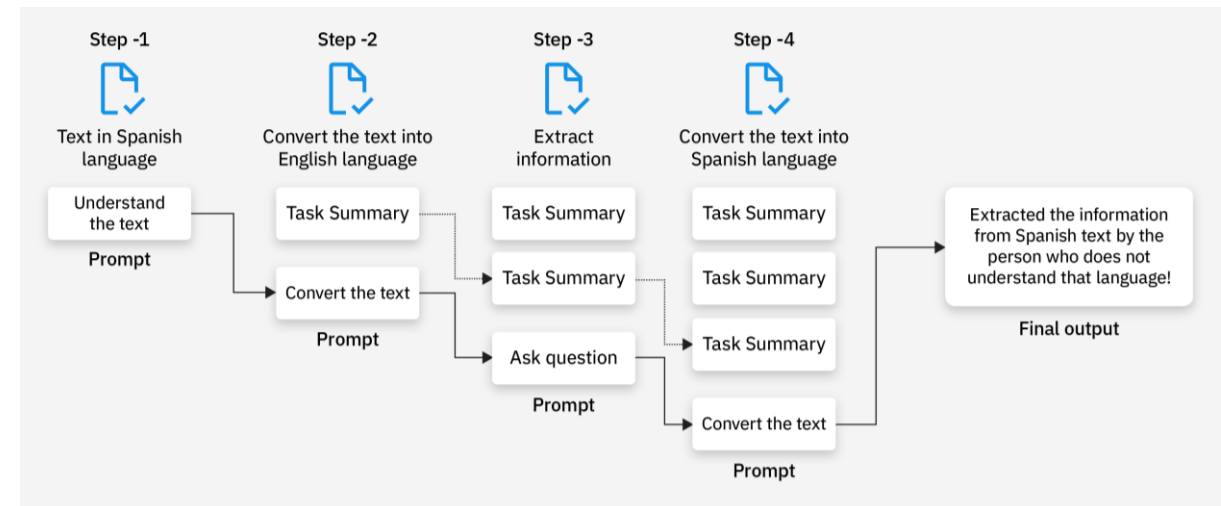

# Self-Consistency

- Generate multiple independent chain-of-thoughts for the same query and choose or aggregate
- Reduces random errors in individual reasoning paths, improving reliability in ambiguous situations

# Prompt Chaining

- Break complex task into a series of focused consecutive prompts
- Modularizes and preserves context across stages, yielding more available attention

# Prompt Engineering Mindset

- Position, Length, Structure, and Phrasing
- Know your environment
  - Data Description & Preparation – set the role and scope
  - Descriptive Data Analysis – quantify and confirm
  - Data Visualization – balance, take recommendations, or choose
  - Data Storytelling (Narrative) – declare the audience and output
  - Dashboard Design – methodology for tangible items
